

1 CARE TEAMS SECTION

1.1 Care Teams Section

```
[section: identifier urn:hl7ii:2.16.840.1.113883.10.20.22.2.500:2019-07-01
(open)]
```

Table 1: Care Teams Section Contexts

Contained By:	Contains:
	Care Team Organizer (optional)

The Care Team Section is used to share historical and current Care Team information. The Care Team Section may be included in any type of C-CDA structured document that is an open template.

An individual can have more than one Care Team. A Care Team can exist over time such as a longitudinal care team which includes historical members that may be active or inactive on the care team as needed. Or a Care Team, such as a rehabilitation team, may exist to address a person's needs associated with a particular care event, or a team can be based on addressing a specific condition. The Care Team Organizer entry template used in the C-CDA Care Teams Section is meant to support the foundation of effective communication, interaction channels and maintenance of current clinical context awareness for the patient, caregivers and care providers to promote care coordination.

Appendix A: Templates defined in C-CDA R2.1 Companion Guide

1.2 Notes Section

[section: identifier urn:hl7ii:2.16.840.1.113883.10.20.22.2.65:2016-11-01 (open)]

Table 3: Notes Section Contexts

Contained By:	Contains:
	Note Activity (required)

The Notes Section allow for inclusion of clinical documentation which does not fit precisely within any other C-CDA section. Multiple Notes sections may be included in a document provided they each include different types of note content as indicated by a different section.code. The Notes Section SHOULD NOT be used in place of a more specific a C-CDA section. For example,
