3.60 Outcome Observation

[observation: identifier urn:oid:2.16.840.1.113883.10.20.22.4.144 (open)]

Table 368: Outcome Observation Contexts

Contained By:	Contains:
Health Status Evaluations and Outcomes Section (required)	Progress Toward Goal Observation (optional) Author Participation (optional) Entry Reference (optional) External Document Reference (optional)

This template represents the outcome of care resulting from the interventions used to treat the patient. In the Care Planning workflow, the judgment about how well the person is progressing towards the goal is based on the observations made about the status of the patient with respect to interventions performed in the pursuit of achieving that goal.

Often thought of as an "actual outcome", the Outcome Observation may be related to goals, progression toward goals, and the associated interventions. For example, an observation outcome of a blood oxygen saturation level of 95% is related to the goal of "Maintain Pulse Ox greater than 92",
