2.24 Health Status Evaluations and Outcomes Section

[section: identifier urn:oid:2.16.840.1.113883.10.20.22.2.61 (open)]

Table 114: Health Status Evaluations and Outcomes Section Contexts

Contained By:	Contains:
Care Plan (V2) (optional)	Outcome Observation (required)

This section has a combined purpose (similar to how the Assessment and Plan section has a dual purpose). This template represents outcomes of the patient's health status. These assessed outcomes are represented as statuses, at points in time. It also includes outcomes of care from the interventions used to treat the patient, related to established care plan goals and/or interventions. The care planning process is cyclical in nature. Thus, information in this section represents evaluations throughout the care process. For example, it may include the initial evaluated outcomes used to create the care plan, or it may include the final outcome achieved over the course of delivering the planned care.

When using this section in a Care Plan document, do not include an Assessment or an Assessment and Plan Section.

Table 115: Health Status Evaluations and Outcomes Section Constraints Overview
